

iConsultera Services

Services Overview

iConsultera provides professional services across staffing, technology, finance, marketing, shipping and logistics.

Staffing and Recruiting

Our staffing service helps organizations identify and engage qualified professionals for permanent, contract, and project-based requirements.

Technology Services

Technology Consulting

Technology consulting helps businesses evaluate their technical requirements, improve applications, and plan practical technology initiatives.

Staff Augmentation

Staff augmentation provides organizations with additional technical professionals who can work alongside their existing teams.

AI and Automation

AI and automation consulting focuses on identifying repetitive processes and using modern software and artificial intelligence to improve productivity.

Finance and Professional Services

Accounting and Finance

Finance services can support accounting operations, financial processes, reporting, and related business requirements.

Marketing and Social Media

Marketing services help organizations improve their digital presence, social media communication, and customer outreach.

Shipping and Logistics

Logistics support focuses on operational coordination and improving processes related to shipping and supply-chain activities.

Solutions

Business Solutions

iConsultera offers specialized solutions designed for different business environments, including hospitality, real estate, and restaurant operations.

Project-Based Consulting

Clients can engage consultants for defined projects when they need specialized expertise without building a permanent internal team.
